

PRESS RELEASE

FOR IMMEDIATE DISTRIBUTION

**Montreal, October 2007 – SHS adds EAM asset management application to its line of products.** SHS, a company specializing in the implementation of ERP (Enterprise Resource Planning) solutions, today announced it has added the EAM (Enterprise Asset Management) software suite to its line of products.

Stéphane Galarneau, President of SHS, explained: “EAM is an essential complementary tool for our current clientele, as it allows businesses to truly take control of their asset management. Our clients, who are primarily manufacturing companies, are seeking solutions that will allow them to 1) optimize equipment maintenance, 2) improve the productivity of their equipment and workforce, 3) increase the efficiency of their inventory, and 4) increase the company’s capability of making claims on equipment under warranty. EAM also allows businesses to make informed decisions regarding the future acquisition and management of equipment through highly effective reporting tools.”

#### **About SHS**

Since 1999, SHS has developed cutting-edge expertise in the implementation of management software for SMEs in the manufacturing sector. Through its know-how and the ERP solutions it sells, SHS maximizes the efficiency of each step in its clients’ supply chain. The experience of the SHS team provides it with an in-depth understanding of the growth issues of its clientele, allowing it to proactively manage all operations, from production to billing. With SHS, business is good!
